MEDICATION REACTION (Allergies / Adverse Reactions)

List all medications you've had an allergy / adverse reaction

Table with 2 columns: Medication, Allergy / Adverse Reaction

1. Have you experienced an inadequate response with an adequate trial of any of the following augmentation therapies during the current depressive episode? (Check all that apply and list how long tried?)

- Yes - Two antidepressants with different mechanisms of action used together
\*\*\*Two antidepressants that affect your body differently
weeks months years
Yes - An antidepressant and a second-generation antipsychotic used together
weeks months years
Yes - An antidepressant and lithium used together
weeks months years
Yes - An antidepressant and thyroid hormone used together
weeks months years
Yes - An antidepressant and buspirone used together
weeks months years
Other
weeks months years
No

2. Have you experienced an inadequate response to an adequate trial of evidenced based psychotherapy (e.g. cognitive behavioral therapy) during the current depressive episode?

\*\*\*Psychotherapy - (also called talk therapy) refers to a variety of treatments that aim to help a person identify and change troubling emotions, thoughts, and behaviors. Most psychotherapy takes place one-on-one with a licensed mental health professional or with other patients in a group setting.
